Hi all,

With respect to benzo[a]pyrene (BaP), we've addressed several things noted in the email below (see highlighted areas) and are working on the remaining.

Attached is the charge to external peer reviewers for benzo[a]pyrene that was revised based on recent SAB CAAC experiences as well as comments from various folks within NCEA. Please let me know if there are any major issues as this will serve as the template for our charges...

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

We are working on what to say in a note to reviewers about the NRC recommendations.

Thanks,
Samantha

Hi everyone:

I am sharing a short list/brain dump of things I was keeping track of to shore up, etc.

I have been looking at these assessments with "NRC implementation, cancer descriptor, UF, and confidence rating" hats on and noticed a few things to share. I hope this is helpful....

Subject: IRIS Mgmt Council: agenda for Sept 16

Hello everyone – For Sept 16 (our first meeting since Aug 26), I'd like to follow-up on our remaining FY14 HHRA milestones. They are:

Step 1. Release lit-search/evidence-tables for BBP and DIBP

Step 3. Release t-Butyl alcohol, ETBE and RDX to interagency review

Step 4. Release Benzo[a]pyrene for peer review

We agreed on Aug 26 to try to make these (deferring n-Butanol and Vanadium pentoxide). I'd like for us to make any adjustments that are necessary to meet this goal.

Thanks. See you all Tuesday at 9,
Vince
